- **Languages:** C/C++, Python, Java, JavaScript, TypeScript.
- **Framework:** Next JS, React JS, Node JS, Express JS, Three.JS.
- **Databases:** Mongo db, MySQL, PostgreSQL.
- **Cloud and DevOps:** GitHub & AWS-Services.
- **Machine Learning and AI:** TensorFlow, PyTorch, HuggingFace.

PROJECTS

University Welfare Society Website – Next.js (Ongoing)

01/2026 – 02/2026. Lahore, Pakistan

- Currently developing a university-based **welfare society web platform** using **Next.js** to enhance performance, SEO, and scalability.
- Implementing modern UI components and responsive layouts to effectively showcase welfare initiatives, events, and impact.
- Working on dynamic content handling, role-based sections, and integration with backend services for announcements and event management.
- Focused on clean architecture, reusable components, and optimized user experience.
- Live Link: welfare-society-project

Campus Nest- MERN Stack

03/2025 – 04/2025. Lahore, Pakistan

- Designed and developed the frontend using **React.js**, offering a responsive and intuitive interface for users to search for budget-friendly hostels nearby.
- Integrated **RESTful APIs** using **Redux Toolkit** to dynamically fetch and display hostel listings and related data.
- Contributed to backend development using **MongoDB**, working towards full-stack functionality and data management.
- Live Link: campusnest-project

IEEE Computer Society Website – Next.js (Ongoing)

06/2025 – 07/2025. Lahore, Pakistan

- Currently developing a university-based **welfare society web platform** using **Next.js** to enhance performance, SEO, and scalability.
- Implementing modern UI components and responsive layouts to effectively showcase welfare initiatives, events, and impact.
- Working on dynamic content handling, role-based sections, and integration with backend services for announcements and event management.
- Focused on clean architecture, reusable components, and optimized user experience.
- Live Link: ieeecs-project

E-Commerce Website – MERN Stack

07/2024 – 08/2024. Lahore, Pakistan

- Designed and developed the frontend using **React.js** and **Tailwind CSS**, ensuring a responsive and modern user experience across devices.
- Implemented **Redux Toolkit** for efficient statemanagement and user authentication workflows.
- Integrated **RESTful APIs** to fetch and displayproduct data dynamically, enabling seamless browsing and purchasing functionality.
- Live Link: thriftly-project

Portfolio – MERN Stack

- Developed the customized portfolio using **React Js** for client.
- Live Link: clien-customt-portolio

LEADERSHIP EXPERIENCES

Director Logistics | UCP TAAKRA 2026

02/2026 Lahore, Pakistan

- Led end-to-end logistics operations for a large-scale inter-university competition, overseeing resource planning, venue management, inventory control, and team coordination.
- Directed cross-functional logistics teams to ensure seamless execution of multi-day events, maintaining efficiency under high-pressure, real-time scenarios.

President | UCP Welfare Society

01/2025 – Present Lahore, Pakistan

- Lead a 20+ member team in planning and executing high-impact welfare initiatives, overseeing strategy, operations, stakeholder engagement, and large-scale events including mega events and ration drives.
- Build strategic partnerships with sponsors and university administration while fostering a collaborative, growth-driven team culture.

Director of Logistics | UCP Welfare Society

10/2024 – 01/2025 Lahore, Pakistan

- Managed complete logistics flow and inventory for mega welfare events, drug awareness campaigns, and Eid ul Adha ration drives, ensuring efficient resource allocation.
- Streamlined operational systems to enhance execution efficiency and reduce resource wastage.

Director of Operations | UCP Welfare Society

01/2024 – 10/2024 Lahore, Pakistan

- Led operational execution of welfare initiatives including orphanage visits, iftar distributions, and community programs, ensuring structured and impactful delivery.
- Developed SOPs to maintain quality standards and scalability of welfare activities.

Logistics Team Member | UCP TAAKRA 2024, 2025

02/2025 Lahore, Pakistan

- Supported logistics operations for a 5-day inter-university competition involving 200+ institutions and 56 competitions, ensuring smooth coordination in a high-pressure environment.
- Demonstrated strong problem-solving and real-time decision-making skills during large-scale event execution.
