PROGESSIONAL SUMMARY

Full Stack Developer with hands-on experience building scalable web applications using **Next.js React.js, Node.js**.
Skilled in developing responsive user interfaces, designing **RESTful APIs**, and managing application state using modern tools like **Redux Toolkit** and Next.js. Experienced in integrating backend services, optimizing performance, and deploying production-ready solutions.
Alongside technical expertise, brings strong leadership experience **as President of UCP Welfare Society & Director Logistics – TAAKRA 2026**, managing cross-functional teams and executing large-scale initiatives. Combines problem-solving, teamwork, and execution skills to deliver impactful and user-focused solutions.

EDUCATION

University of Central Punjab. **November 2022 - December 2026**
Bachelor of Computer Science

PROFESSIONAL EXPERIENCE

Software Development Intern – Innovation.tech **August 2024 - October 2024**

- Collaborated with a team of 4 to implement a **RESTful API** using Node.js and Expresss, ensuring seamless data flow between frontend and backend.
- Developed a fully **responsive E-commerce website** using **React.js** and **MUI**, improved user management using Redux tool kit.
- Used **GitHub** and **Git** for effective version control, working with interns and senior engineers to produce high- caliber, maintainable code.

Junior Webmaster – IEEE-CS Society **October 2024 - January 2025**

- Assisted in developing and maintaining the official website for the IEEE Computer Society UCP Student Chapter.
- Contributed to creating a dynamic and user-friendly experience by updating content, posting event announcements, and managing student resources under supervision.
- Collaborated with the technical team to troubleshoot website issues, optimize page performance, and ensure smooth functionality across different devices and browsers.

SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, Python, Java, C/C++, HTML5, SQL
- **Frontend/Frameworks:** Next.js, React.js, Tailwind CSS, PrimeReact, TanStack Query, Material UI, Ant Design.
- **Backend:** Node.js, tRPC, Express.js, REST APIs, Spring Boot, FastAPI
- **Databases:** PostgreSQL, MongoDB, MySQL, Kysely, BigQuery.
- **Tools:** Git, GitHub, Docker, Vercel, Zod, Sentry, Vitest, Postman
- **Cloud and DevOps:** GitHub, Vercel, Netlify & AWS-Foundations.
- **ML & AI:** TensorFlow, PyTorch, Hugging Face, RAG, ChromaDB.
- **Soft Skills:** Strong Leadership, Communication, Teamwork, Team Coordination, Problem-Solving,

Time Management, Adaptability, Attention to Detail, Interpersonal Skill.

PROJECTS & OUTSIDE EXPERIENCE

Launch-Pulse – AI-Powered Startup Evaluation Platform (FYP) January 2026 – Present

- Developed an **AI-powered full-stack platform** to predict startup success probability and analyze risk factors using machine learning models.
- Built scalable frontend using **Next.js (App Router**), **TypeScript**, and Tailwind CSS, ensuring responsive and SEO-optimized UI.
- Designed end-to-end type-safe APIs using **tRPC** for seamless client-server communication
- Integrated machine learning services **(FastAPI)** to deliver real-time predictions, growth analysis, and market fit scoring.
- Implemented **PostgreSQL database** architecture with **Kysely ORM** and managed migrations for scalable data handling.
- Developed features for document management, enabling users to upload and manage pitch decks and business plans.
- Created **real-time analytics dashboard** to visualize startup insights and performance metrics.
- Deployed production-ready application using **Supabase (PostgreSQL)** and **Vercel**, ensuring scalability and reliability.
- **Live Link**: Launch-pulse Project

University Welfare Society Website – Next.js January 2026 – Feb 2026.

- Developed a **full-stack welfare management platform** using **Next.js**, enabling efficient handling of events, volunteers, and community initiatives
- Implemented **role-based authentication and authorization** with secure access control and protected routes for admin and user roles
- Created a comprehensive **admin dashboard** to manage events, announcements, and volunteer coordination workflows
- Developed and integrated **RESTful APIs** for dynamic content handling and scalable backend operations
- Designed a **responsive, SEO-optimized UI** to enhance accessibility, performance, and user engagement
- Applied **component-based architecture** and reusable UI patterns to ensure maintainability and scalability
- **Live Link**: welfare-society-project

Campus Nest- MERN Stack March 2025 – April 2025

- Developed a **full-stack hostel discovery platform** enabling students to find budget-friendly accommodation using advanced search and filtering features
- Implemented **secure authentication and authorization using JWT**, including user-specific features such as saved listings and personalized experiences
- Integrated **Google Maps API** for location-based search, distance calculation, and improved user decision-making
- Designed and built a **dynamic filtering system** (price, location, facilities, ratings) to enhance usability and search efficiency
- Developed **RESTful APIs using Node.js and Express.js**, ensuring seamless communication between frontend and backend
- Managed scalable data operations using **MongoDB** for hostel listings, user data, and reviews
- Built an **admin dashboard** for managing listings, moderating content, and maintaining platform integrity
- Optimized application performance and responsiveness using **React.js and Redux Toolkit** for efficient state management.
- **Live Link**: campusnest-project

IEEE Computer Society Website – Next.js **June 2025 – July 2025**.

- Developed a dynamic website for managing student chapter activities and technical events.
- Designed modern UI components to display announcements, resources, and event details.
- Implemented structured content handling to improve maintainability and scalability.
- Collaborated with team members to ensure consistent design and functionality.
- **Live Link**: ieeecs-project

E-Commerce Website – MERN Stack **July 2024 – August 2024**.

- Designed and developed the frontend using **React.js** and **Tailwind CSS**, ensuring a responsive and modern user experience across devices.
- Implemented **Redux Toolkit** for efficient state management and user authentication workflows.
- Integrated **RESTful APIs** to fetch and display product data dynamically, enabling seamless browsing and purchasing functionality.
- **Live Link**: thriftly-project

Portfolio – MERN Stack

- Developed customized portfolio using **React Js** for client.
- **Live Link**: clien-customt-portolio

LEADERSHIP EXPERIENCES

Director Logistics | UCP TAAKRA 2026

02/2026 Lahore, Pakistan

- Led **end-to-end logistics operations** for a large-scale inter-university competition , overseeing **resource planning, venue management, inventory control**, and **team coordination**.
- Directed cross-functional logistics teams to ensure seamless execution of multi-day events, maintaining efficiency under high-pressure, real-time scenarios.

President | UCP Welfare Society

01/2025 – Present Lahore, Pakistan

- **Lead a 20+ member team** in planning and executing high-impact welfare initiatives, overseeing **strategy, operations, stakeholder engagement**, and large-scale events including mega events and ration drives.
- Build strategic partnerships with sponsors and university administration while fostering a collaborative, growth-driven team culture.
